

# Moqups:

Your team project and  
exporting a PDF

# Accessing your team project

You **must** use the team project provided to collaborate on your mockup.

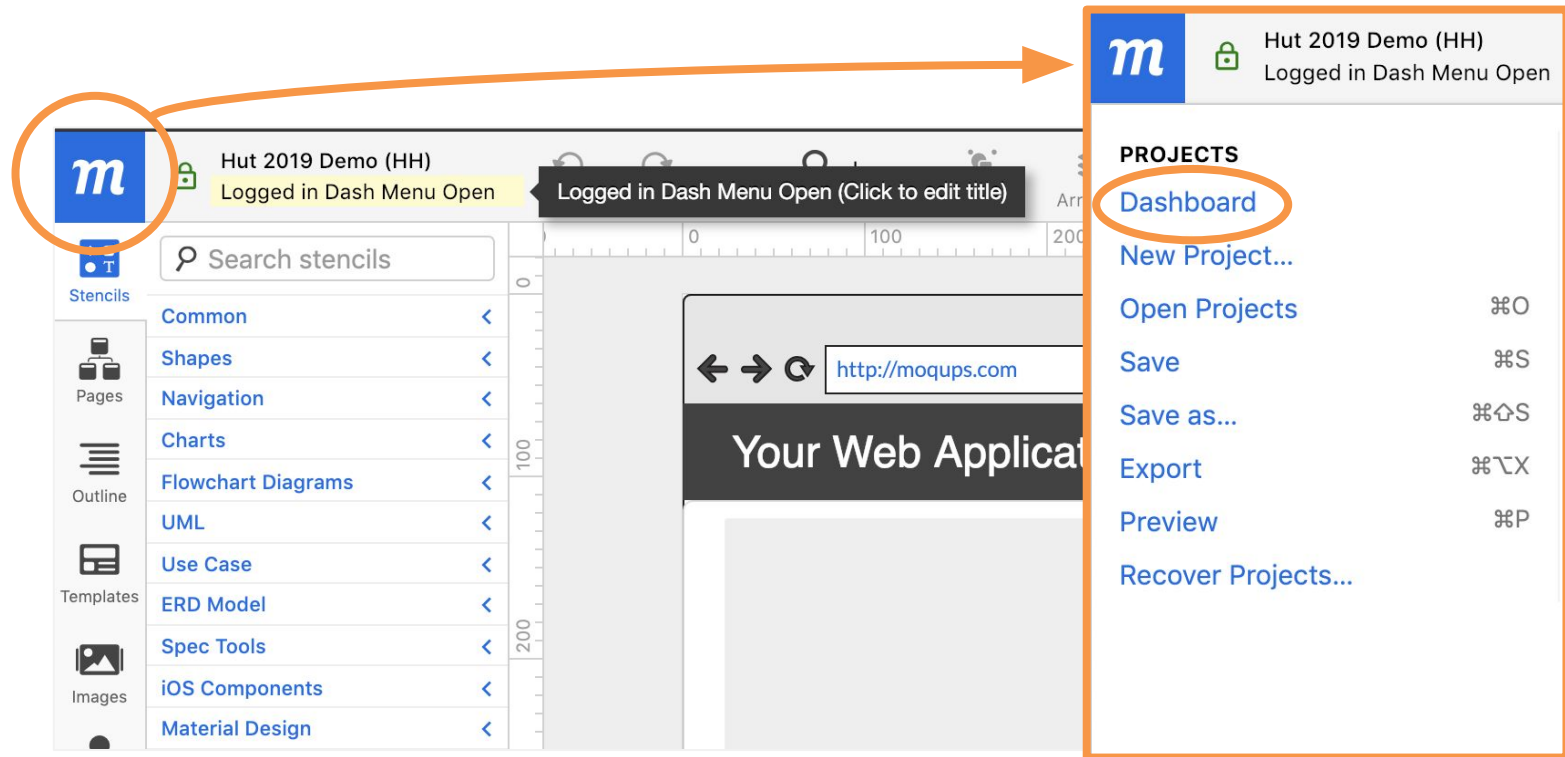

If you use a project on your personal account, you **will not** be able to export the mockup as an interactive PDF.

We cannot copy projects from personal accounts into the team projects.

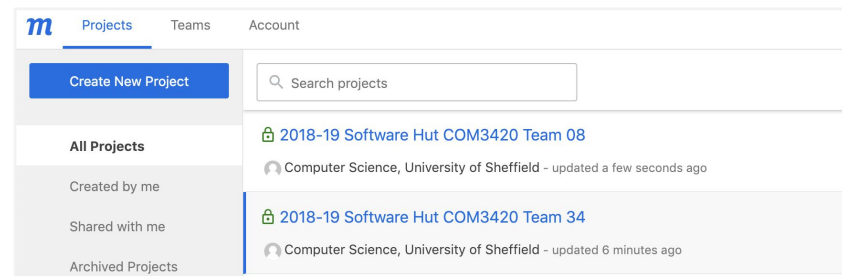

Please make sure you are working on the correct project – instructions for accessing your team project follow.

# Accessing your team project

You should have received an email from Moqups inviting you to your team project. **Please check your spam folders for this.**

When logged in, click the “M” icon to get the menu. Then click “Dashboard”. Your team project should be listed.

# Exporting the interactive PDF

Once you are happy with your project, you can export an interactive PDF via the "Export" menu at the top of the screen.
